The Arrowsmith is a two bedroom plus den or convert this to a third bedroom when guests arrive. Equipped with a large kitchen under sweeping vaults and clearstory windows there is no shortage of natural light.

With large west facing back windows, the open plan invites nature into your living, dining and kitchen. The amazing 8' high windows on 10' vaulted ceilings make for a stunning connection to nature in all seasons.

At approximately 1500 sq ft plus garage it's great for downsizing yet large enough when relatives come for an extended visit. A large double garage offers great access via mudroom and laundry, large 4' hallways and 10' ceilings. The model offers many natural locations for a gas fireplace for those winter months and stormy days.

The home model is ideally suited for lots 1 thru 6 in various modifications.
